Goodnight, Numbers

Synopsis

A New York Times *Bestselling* bedtime story with a math twist from Danica McKellar (well-known for her roles on *The Wonder Years* and *The West Wing*, and an acclaimed author of multiple popular math books) which sneaks in secret counting concepts on each page to help make your child smarter! This deceptively simple bedtime book, the first in the McKellar Math line, gives your child the building blocks for math success. As children say goodnight to the objects all around them—three wheels on a tricycle, four legs on a cat—they will connect with the real numbers in their world while creating cuddly memories, night after night. Actress, math whiz, and New York Times bestselling author Danica McKellar uses her proven math success to show children that loving numbers is as easy as 1, 2, 3. "The joys of counting combine with pretty art and homage to *Goodnight Moon*." *Kirkus* "McKellar brings her enthusiasm for mathematics to a younger crowd in this gentle and well-executed counting book." *Publishers Weekly* "A similarly simple, quiet feel as Margaret Wise Brown's iconic *Goodnight Moon*...there is a lot to count on." *Booklist* "A winner for bedtimes or storytimes focusing on counting." *School Library Journal*

Customer Reviews

"Actor and author McKellar (*Math Doesn't Suck*) brings her enthusiasm for mathematics to a

younger crowd in this gentle and well-executed counting book. As the book proceeds from one to 10, cherubic toddlers of various ethnicities interact with their parents and surroundings: 'Goodnight, four paws./ Goodnight, kitty cat./ Goodnight, four froggies/ on the bathroom mat.' -Publisher's Weekly "The joys of counting combine with pretty art and homage to Goodnight Moon." -Kirkus

Danica McKellar is the #1 New York Times bestselling author of Goodnight, Numbers and the groundbreaking math books for middle school and high school readers, including Kiss My Math, and a summa cum laude graduate of UCLA with a degree in mathematics. She is well known for her acting roles on The Wonder Years, The West Wing, and multiple television movies for Hallmark Channel and Lifetime. She was also a quarterfinalist on Dancing with the Stars. She lives with her family in Los Angeles. Visit her at McKellarMath.com. Alicia Padraon is known for her sweet characters and soft colors. She lives in Florida with her husband, two children, and dogs Lucy and Luna.

We loved her on Wonder Years & Dancing With the Stars, and now we love her even more. I bought two for my youngest granddaughter, and one for the newest Great Grandson. With two more Great Grandchildren on the way, I'll purchase another two. I am so impressed with Danica that I have bought her other Math books, so I can finally learn and be comfortable with Math. At 75, I wish we had these books available 65 years ago.

My daughter loves this book and is quickly learning her numbers at just shy of 3 years old. We read it to her nightly and there are many items to count in coordination with each number that keeps it fun and interesting. We enjoy how large the pages are as well as colorful. Great purchase for children

This book is fantastic! My toddler doesn't love every book that comes his way, but this one captured his attention and he would even point things out to me in it (the octopus was his favorite). I recommend this book to anyone who wants their child to be captivated by numbers!

Bought this as a baby shower gift for a fellow math specialist. Nice illustrations, great for reading to little ones to help them learn the words for reciting numbers. Of course it does not build concepts of quantity or cardinality, but it IS a baby book after all. Charming, soothing, nice bedtime book.

I read it to my 18 month old grandson...while he sat nestled close to me on the chaise. At first he was touching the pages.... then as if by magic...out like the lights! I think he liked it. I love it!

Great story and wonderful illustrations. The suggestions for discussions with little number-lovers are very good.

My great granddaughter loves to be read this book. We say the numbers on the inside of the covers and count the items on each page. She now recognizes numbers and I'm hoping shortly the words also. Such as "2" and "TWO". Recommend this book.

This book is well done. I have wonderful discussions with my granddaughter as we say goodnight to each number. She loves to study the pages and tell me about the many ways she sees each number. She loves the pictures, the structure and the variety of the representations. Right now she is counting, but I see her developing a deeper number sense as she grows with this book.
