Customer Reviews

It's kind of funny to read a book about walking, when you know how to do it. However, this has gotten me very excited to begin working toward the goal of 10,000 steps! And to purchase a fit it one ASAP! Thank you for inspiring me to get off my butt.

Must be a pretty good book since it encourage me to go out and spend \$100 for a FitBit One to count my steps.

I completed my goal of 10000 steps by using the tips necessary to accomplish my goals. Thank you so much.

I love this book. It has made me motivated to start walking for my health. I liked all the suggestions for creating specific goals, apps to record steps and progress and stretches to do after walking. Thanks for writing this book!

This is a great book for the person who is new to walking/exercise....gives you the motivation and the means to make a plan to incorporate walking into your routine.

I love Steve's books! I just started walking again today only to come back from my walk and find Steve has created yet another GREAT BOOK! I'm a speed reader.....it's great and my new habit starting today!

Everything in the book was usable. It was simple to the point of being common sense, but we so often complicate things. The book really helped me recognize and deal with obstacles and it showed me a simple path to progress.

Practical advice on getting the most out of walking. I found some new tips and suggestions, even though I'm an avid walker. Particularly helpful for folks who are trying to develop a walking habit or practice.
