Customer Reviews

I had to get this book for a college course and it was marked at a pretty steep price for a college student. A friend told me that I should look at [to see if I could find a better deal](#) and I definitely did! It was the exact book that was required for the course and came in pristine condition when I received it. Anyone looking for a great deal for school books should definitely check out !

This book is not what it claims to be. Although it claims to be a "Concise Hornbook" it is significantly less in scope than a "Hornbook". I am hoping to be able to get a refund.

This is an easy read. Everything is laid out plainly and coherently. Chapters include in-depth outlines that provide insight into what will be discussed, which acts as a "cheat sheet" to law students using this book in the classroom.

I bought this for a class and reading it chapter by chapter is really boring. Especially since there are

only four chapters and chapter three is a 150+ pages.
