Book by Warren, Tom

Reversing Chronic Disease by Tom Warren is a followup to his first book Beating Alzheimer's. In the second book Tom tells his experience with an environmental doctor and his cleaning up his "breathing zone" and living area in order to not expose his brain to environmental toxins that would not bother most people. At the advice of his environmental doctor he cleaned out his bedroom of things like ink laden newspapers and magazines which would off gas. He advised Tom to live no closer than 5 miles to an Interstate highway where he would be breathing vapors from car exhaust. He advised getting rid of a petroleum based heating system and going to electric heat. When Tom got into a new automobile his brain was affected again when he smelled the off gassing of the toxic chemicals coming off the car's interior. So this book is an in-depth instruction on how to clean up your environment. Tom explained that whenever he would smell chemicals his brain would swell and would lead him to further memory loss. Many people with mercury poisoning, as Tom had from his dental fillings, have chemical sensitivities and have brain symptoms from having mercury in their brains. For further research on Alzheimer's look up Dr. Boyd Haley's interview about his research at the University of Kentucky. The title of the video is "Boyd Haley PhD Discusses Flaws in the Saxe

Alzheimer's Study" and appears on the MercuryExposure YouTube channel. Tom's books will give you hope you can stop or slowdown Alzheimer's if you know what to do and you have not waited too long. Don't expect your neurologist to agree with you. I know one neurologist in Maryland who was poisoned by his dental fillings and advised his patients to have their amalgam fillings removed SAFELY and to followup with chelation to detox mercury from their bodies. He had his medical license taken away from him by the Maryland medical board. The medical board only asked him two questions: 1) Are you telling people to have their amalgam fillings removed? and 2) Are you telling your patients to do chelation? Mercury toxicity and its causing neurological disease is not politically or medically correct because it would point back to both dentists and medical doctors poisoning people with dental products and vaccines. The government agency NIH (National Institutes of Health) told Dr. Boyd Haley they were not interested in this type of research and took away his grant money for Alzheimer's research, and stopped sending him Alzheimer's brains when he spoke out against vaccines and dental materials that contain mercury. For an information packet on how to safely have mercury dental fillings removed and a list of safe holistic biological dentists, contact DAMS, Dental Amalgam Mercury Solutions in Minnesota. Never have mercury fillings removed by regular dentists who have not been trained in its safe removal. Cosmetic dentists may not use mercury, but this does not mean they know how to remove mercury safely as these protocols are not taught in dental schools since the standards of care in dentistry are so low. Marie Gray Flowers DAMS President
