Frederic P. Hartwell has authored or co-authored numerous books, including Practical Electrical Wiring, American Electricians' Handbook, and National Electrical Code Handbook. Writing for both amateurs and professionals, Herbert P. Richter authored the first edition of Wiring Simplified in 1932 followed by Practical Electrical Wiring in 1939. W Schwan Creighton is the coauthor of Wiring Simplified and Practical Electrical Wiring for several editions and a columnist for the magazine Electrical Contractor.

I buy one of these every 3 years because I always did. My late father taught me electric, and would buy me this book every 3 years. When he got to old and crippled up I still bought him one and his eyes would light up. If I ever got stuck I would talk to him and he would help solve my problem or mistake. It's not a very good book. The Practical Wiring book for residences and barns is much

better and written by the same guys. Wiring a House for Pros by Pros. by Rex Cauldwell is the book to get. I would recommend all of these books.

I am about halfway through and it is a little over my head... I have learned a lot but apparently working and electricity are not easy to simplify.

Great

very good and to the point.

helped to review new changes in code.

It is not very good guide book.

A must have, even for the seasoned DIY. Well organized, easy to follow and includes those current code Q's the DIY may not know or remember. I could have used some guidance on wiring the service to the panel, but understand this is beyond the average DIY.

Great book I have bought it for all my friends over the years
