Pro-Life: Saving The Lives Of Unborn Children, Making Possible Their Descendants, And Helping Their Parents

Synopsis

The choice is yours: will you choose life or will you choose death? When it comes to determining your stance on the abortion debate, this simple question exhibits your belief and understanding of what it means to let an unborn child live or die. Author Jim Harrison is the happy father of two adult sons and grandfather of four grandchildren, so he believes in the preciousness of life and giving a child a chance. His new nonfiction book, *Pro-Life: Saving the Lives of Unborn Children, Making Possible Their Descendants, and Helping Their Parents*, gives readers a comprehensive glimpse into conception, pregnancy and how abortion changes the whole biological process. Jim begins his argument for pro-life by detailing the intricate steps of procreation, from the conception between an egg and a sperm to the milestones an unborn baby reaches at different points in pregnancy: the first time practicing breathing, the ability to listen, learn and remember, the preparation for being delivered. However, Jim also makes sure to educate readers, men and women, on the unsettling procedures performed under the umbrella of abortion; procedures that are more inhumane and violent than an unsuspecting mother-to-be might believe. Abortion also doesn't end when the child is removed, but lasts with the former mother through medical complications and internal struggles with her choice. Included in *Pro-Life* are discussion points about descendants from an aborted child that will never be born, and discoveries/achievements never made, as well as the lack of babies to be adopted by countless parents ready to begin their families. The hope is that fathers and mothers will use the resources and knowledge within the book to make the life-securing decision to give their children continued life, and maybe adopt them to prospective parents ready to welcome them home. As stated earlier, the choice is yours to make; to Jim, you can't know what God has chosen for your child to achieve if not given life.

Book Information

Paperback: 114 pages

Publisher: Xulon Press (April 30, 2017)

Customer Reviews

Jim Harrison is a scientist and attorney who lives in Evans, Georgia. He has been married to his wife, Beverly, for more than fifty years. Together they have two wonderful sons, two amazing daughters-in-law, and four grandchildren who are the loves of their lives. Jim has academic degrees from Montclair State University, the University of Nebraska at Omaha, American University, and the American University Washington College of Law. He has also studied at California State University at Chico and Texas A&M University. Jim's work experience includes serving as a weather officer in the United States Air Force and as mathematician, physical scientist, meteorologist and supervisory meteorologist in the National Oceanic and Atmospheric Administration (NOAA). His last position before retirement was Deputy Federal Coordinator for Meteorological Services and Supporting Research in Silver Spring, Maryland, a responsibility that coordinated operational weather and research activities among fourteen federal agencies. Since retirement, Jim has attempted to make contributions in the pro-life area concerning unborn children.

Concise, short (read in one sitting) and unintimidating (no overload of info). Presented in a humble, non-judgmental manner and goes straight to the heart of the issue, laying out well-documented facts. Chapter 3, The Development of Your Baby, brought tears to my eyes as it reminded me of the absolute miracle of life and handiwork of our Creator. It has a couple of helpful appendixes and offers direction or guidance for those who may need it. Highly recommended!

Thoroughly researched and documented. An insightful perspective on a controversial topic.
