Labor Economics: Principles In Practice

Synopsis

Labor Economics: Principles in Practice provides a concise, tightly integrated, and engaging exploration of labor economics. Focusing on core principles and immersing students in real data from the Current Population Survey (CPS), Ken McLaughlin lays out a clear analytical framework for thinking about labor-market issues and policies. The book's entire presentation-- from the conversational tone to the practice questions within each section--makes labor economics highly accessible to more students.

Customer Reviews

"I am delighted with the straightforward clarity of the writing. It is pitched just right: direct and plain but not condescending. The use of active tense and the tendency not to let sentences run on compares well with my current text."--Michael Brun, Illinois State University
"I think this text serves as a great outline for a course, and provides a great overview for non-economics majors who might benefit from labor economics but would be lost by more rigorous economic material."--Earl H. Davis III, Nicholls State University
"The book gives a good grounding on the basics of labor economics, focusing on the student's grasp of those basics. Applications and examples are a key and integral part of exposition of the theory. Explanations are clear and precise. A particularly exciting aspect of the text is that it immerses students in data and data analysis from the beginning. The author introduces the students to the CPS and statistical methods for testing economic hypotheses and then the CPS is returned to in most chapters to connect the student to real economic research and

to integrate the topics. Specifically, the text starts with a basic wage regression and as each topic is covered another variable(s) is added to the right hand side."--Gerald Marschke, SUNY Albany

Kenneth J. McLaughlin is an Associate Professor and master teacher of microeconomics and labor economics at City University of New York. He received his Ph.D. in Economics from the University of Chicago and has taught at the University of Rochester, University of Chicago's Graduate School of Business, and Columbia University.
