Factual case histories of individuals confronted with life-threatening diseases (lung cancer and respiratory diseases) who overcame it using the Gerson Therapy.

This book contained no information about how to achieve the claim on the cover, namely, heal lung cancer and respiratory diseases. It was nothing more than a few hastily compiled "case studies" where people had supposedly benefited from following the Gerson Therapy. It was, in my view, a total waste of time and money...

Roger Cotter that gave it a 1 star rating obviously did NOT read the description. First thing it states IS the clinical studies..A good example would be "forks over knives" it's not about forks and knives...that's why it's best to ALWAYS read the description.I apologize if I sound rude but it's annoying when people write reviews that aren't helpful when they haven't taken the time , all of 10 seconds to read the description of the book.
