Author Caesar Owens understands dogs and has volunteered his talents at vet hospitals, clinics, shelters, and kennels. He has the patience to work with aggressive dogs and those dogs that have behavior challenges. His advice about traveling with your loved pet is sound. You can take your dogs on trips cross country or even overseas via automobile, planes, and even some ships. But it can only be accomplished successfully by planning ahead to assure meeting requirements of commercial transportation and hotels/motels. The author provides the steps and techniques to ensure you have an enjoyable trip with your loved pet. It is also advisable to write up a checklist to make sure nothing is forgotten; this guide will help you accomplish that. Unhealthy or old dogs travel with more stress than healthy dogs, so start by having your vet check his health, currency of vaccinations, have a microchip inserted for identification, and provide you with a health certificate for you to carry, even if traveling from state to state. And, especially, to meet requirements of different airlines and ships. It is easier traveling with a dog who has been well socialized or gone through companion dog obedience. When staying in hotels, it is best to keep your dog in his crate to prevent any damage he may do while left there alone. Thus it is always important, regardless of the breed, to always crate train your dog from day one. And wherever you travel outside your home, make sure your dog has his collar on with identifying tags. Also consider taking along first aid items that you may need, for example, antibiotic and bandaging should the dog cut his foot perhaps at a rest stop. This author provides many practical ideas to help your dog travel comfortably and to give your family a good experience. This is a very worthy guide to help one understand the responsibilities of being a responsible owner. As the author says, know the rules of traveling with your pet and enjoy the trip. And I add, don't put your dog on top of your vehicle in a wire crate! Be compassionate!

... on this oh so beautiful planet!! love my dog, I love my dog ... so I take him with me where I can. But there are essentials to respect - for Your best, his or her best, and the very best of the others. Not every beach-owner allows dogs on his site, but the number is rising. So do those of airplanes who allow Your darling doggie beside You on a seat, instead of stuffing him/her with the other dogs in the luggage room. Hotels and restaurants offer food and water to dogs - and often cats, too...:) For this reason, it's almost unfair if we leave our animals behind when we travel, and we don't need to come up with excuses about not bringing out animals along, is writing the author, dog lover Caesar Owens. For Euro 0,89 or US \$ 1,19 (!!!) or £ 0,77 - less than the price of a

And I enjoyed the photos very much, too!A big, fat thanks to Mr Owens and a hearty WOOWOF from my doggie!

I received a copy from the author and this is my honest review.I found A Quick Start Guide to Traveling with Your Dog to have many good ideas with a great table of contents to get you to the information you need for a specific issue with traveling with a dog. I was impressed how complete and to the point the information is for all types of travel and have used it to travel with our Lab several times. I am sure I will be using it for a reference in the future because our girl is part of the family and we don't like to leave her home and have to depend of friends or neighbors for her care while we are away.

I found this book informative and well written. Owens covered topics I hadn't thought of like what countries welcome pets, and boating with a dog. We travel by car with our Irish Terrier, Woogie, and he loves La Quinta hotels! No charge for pets and they allow you to leave them in the room while you are out for a meal. I make sure our bags are there & he has his bowls so he knows we're coming back. Make sure to put out the Do Not Disturb sign!

Australia does not make it easy to travel with pets of any kind - dogs are the most popular pets that people like to take with them - but most establishments don't realise that some people - myself - are more likely to travel with pet rats! Makes it easy to sneak them into the room lolHowever, this book - a guide to travelling with your dog in and outside the USA - offers common sense advice for everything to preparation to mode of travel to the etiquette of your dog's behaviour when you get to your destination.Caesar Owens has written a comprehensive list of requirements which a person should research before setting out with his or her dog. It is clear, well-written and I couldn't find anything missing from the essential information.The cover is gorgeous and the photos throughout the chapters are lovely.
