First Aid For Colleges And Universities (10th Edition)

Synopsis

First Aid for Colleges and Universities , Tenth Edition, is intended for students in a full-semester course leading to First Aid/CPR certification. It is designed specifically for college-level courses in First Aid and meets American Red Cross guidelines, while providing more depth and detail than the other available texts in the market. In addition to comprehensive coverage of all first aid situations a responder is likely to encounter, this book provides self-tests, critical thinking exercises, and skill assessment checklists. The Tenth Edition features updated content aligned with the new 2010 AHA and ARC CPR Guidelines, which affect many critical procedures in the entire field. Content also reflects the current developments, updated pedagogy, and best practices. Illustrations and photos have also been selectively updated and refreshed throughout the book.

Book Information

Paperback: 552 pages

Publisher: Pearson; 10 edition (June 4, 2011)

Language: English

Customer Reviews

Keith J. Karren, Ph.D., EMT-B, is professor of Health Sciences at Brigham Young University, where he teaches First Aid and related courses. He is also the director of Emergency Medical Services (EMS), an educational service that offers continuing education for EMS personnel. He has been active in higher education for over 37 years, is the author of numerous EMS publications, and is an organizer of key EMS conferences. Daniel Limmer, NREMT-P, is a faculty member at Eastern Maine Community College in Bangor, Maine. He has been involved in EMS and law enforcement for over 28 years and still practices as a paramedic with Kennebunk Fire Rescue in Kennebunk, Maine. Dan is a frequent lecturer at conferences and colleges nationwide. He is a

co-author of several textbooks, including Emergency Care, Essentials of Emergency Care, Advanced Medical Life Support, and First Responder: A Skills Approach. Joseph J. Mistovich, M.Ed, NREMT-P, is chair of the Department of Health Professions and a professor at Youngstown State University, Ohio. He has more than 22 years of experience as an educator in emergency medical services and multidisciplinary health care. He received a Master of Education degree from Kent State University, a Bachelor of Science in Applied Science degree and an Associate in Applied Science degree in Emergency Medical Services, both from Youngstown State University. He has authored several EMS textbooks and numerous EMS articles. He is a frequent speaker at state and national conferences. Randall Benner, M.Ed, NREMT-P, is a contributing author to this edition. He is the director of the Emergency Medical Technology program at Youngstown State University, where he teaches courses in psychoneuroimmunology, behavior change, and health psychology. He has authored and co-authored numerous texts, several with Joe Mistovich, and is a prime organizer of a major EMS annual conference held in Salt Lake City.

Everything in here is great but it's such overkill - you will get the same certification from a 6 hour CPR first aid class as you will get from reading this textbook and taking a college class. You may be more prepared to provide aid, but you will have no more say in patient care than the dude who did it on a weekend. If you are so interested that you want to take a class, take an EMT class instead - apply your knowledge and broaden your scope.

Amazing book. It was very helpful and helped remind me of certain first aid skills even after being in EMS and nursing for 10 years. Had to have this for one of my BSN courses and thoroughly enjoyed it.

It is what it is. A textbook. Not bad condition at all and only a few previous markings with hig lighters. The book is quite dated as far as graphics and images but the topic is still unchanged I suppose.

Love this book! I had to have it for my class in school and I kept it afterwards. I keep it with my first aid kit.

This is a Great Book! ..I bought this book for my daughter for college. it served its purpose for the class she was taking. Purchased this book new on cause it had a better price than her school as well as other websites I had viewed. If you're looking to save money buy this book from

So the pages of this book are perforated for some weird reason, BE CAREFUL

Great Book! Very detailed and lots of pictures. My only recommendation is become CPR certified before taking the class.

greet book learned alot
