Sharks Of The World Coloring Book (Dover Nature Coloring Book)

Synopsis

Over 350 million years, sharks have evolved into the most successful hunters to roam the seas. This educational and entertaining coloring book focuses on 25 species of shark, ranging in size from the relatively tiny cookiecutter shark (1-1/2 feet long) to the monstrous whale shark (up to 65 feet). Carefully researched and skillfully rendered line drawings depict such fascinating species as the snakelike frilled shark; the thresher shark with its long, scythe-shaped tail; the rare and bizarre goblin shark; the dreaded great white shark, one of the most fearsome predators in the sea, and the swift and graceful blue shark. Also depicted are some of the shark's closest relatives: the spotted ratfish, sting ray, common skate, Atlantic torpedo ray, Atlantic guitarfish and smalltooth sawfish. A fact-filled caption accompanies each of Lynn Hunter's vivid illustrations, providing the sharks' common and scientific names, habitat, behavior, size, color, distinguishing features and other information. Further enhancing the book are a general introduction and a dramatic double-page illustration showing all 25 sharks drawn to scale. Educational and informative, *Sharks of the World Coloring Book* doubles as an excellent and inexpensive source of royalty-free illustrations for artists and designers.

Book Information

Series: Dover Nature Coloring Book

Paperback: 32 pages

Publisher: Dover Publications; Clr Csm edition (November 1, 1989)

Grade Level: 3 - 8

Customer Reviews

If you're scared of sharks you can face your fears with this coloring book- because a pink shark floating in purple water with pink teeth just isn't as frightening any longer. Who knew that coloring the killers of the deep could be this relaxing? Yes your marker collection will ruin the paper so spring for a set of colored pencils and you'll enjoy the book more.

This is a great coloring book for shark fans. Many detailed pages and many types of sharks. My 4 year old knows all of these sharks and teaches us about them. The reason this got only 3 stars is because I already have the coloring book that was sent. I bought this hoping the first photo shown would be the book I would get. It was not, I received the book I already had, the 3rd photo shown that is blue with big shark on it is what you will get, not the one with 4 squares and different sharks.

Better than I expected. Good information in addition to many types of sharks to color. Kids will get a thrill but so will 'sharky' adults. Includes some rare sharks like Goblin, Megamouth too. Basic coloring, nothing intricate, which I find a plus.

I purchased this coloring book for Shark Week. I thought it'd be a fun additional activity to go along with the shark shows. The only reason this coloring book gets 4 stars instead of 5 in the picture quality. I think it must just be a shark thing because I love all my other Dover coloring books. But with the details on sharks, there are little dots, which make them a bit muddled looking. Also, because of the dots, copies don't turn out as well as they do with other Dover coloring books. (My kids aren't allowed to color directly in my "good" coloring books. They make copies and color the copies.) I am impressed with all the detail on each page. And I especially like the size comparison page in the middle of the book. Then you can see just how big a Whale Shark is and just how small the Luminous Shark is.

My grandson loves this book. Nice quality and very pleased with my purchase. Thank you.

The Shark Polybag of Sharks, the Shark coloring book, are for teaching my 4-1/2 yr. old granddaughter about the ocean and the living animals and plants that exist in it. The poly play sharks and the coloring book have been a blessing in teaching with colors and the play sharks for color and the description of each species of sharks. This will take some time, yet, it is something she really enjoys doing, especially when we go to the Marine Museum of Natural History. Can't beat these items, have been wonderful in the teaching and learning of the sharks of each species.

Pages are printed on both sides and large centerfold is on separate pages so difficult to get out of the book if you want to keep the pictures on the wall.

Great book for educational or adult coloring purposes. Too bad the pages are not single sided. I copied onto cardstock and completed several pages with copic markers. Looks amazing. I highly recommend this book.
