Customer Reviews

Paula M. Duncan, MD, FAAP, is a professor of pediatrics at the University of Vermont College of Medicine.

This is the best pocket reference available for anyone who sees pediatric patients-from prenatal out to 21 years of age. The booklet is set up with all developmental expectations for each well-child visit, examination guidelines and family, social, safety and nutritional points for each age. The appendix gives tooth charts for primary and permanent teeth, Tanner Stages for boys and girls, and Developmental Milestones for each age.

Exactly as pictured and described. Great reference.

Very informative and useful for FNP pediatric clinicals

Nice Reference. Quick and easy to navigate.

Perfect size to carry in my pocket and it has been very helpful for my clinical rotations.

Great

This has helped me a lot during my pediatric practicum rotation.

Ok supplement, I would probably buy the full version rather than the pocket guide but that is just my opinion and depends on what you are needing it for. If you are in a peds class, definitely buy the full version! Great information!
