Twelve Audubon Bookmarks (Dover Bookmarks)

Synopsis

The great American wildlife artist John James Audubon created images of North American birds that have seldom been surpassed in beauty and aesthetic quality. Here are twelve of the best-known of his illustrations, including the black-and-white warbler, brown creeper, Carolina wren, mangrove cuckoo, clay-colored sparrow, northern oriole, and six more. Each illustration is printed in full color on one side of a sturdy bookmark (identifications on back) – perfect companions for your reading pleasure.

Customer Reviews

Pretty. BUT not stiff enough cardboard; fold over if they are in a book & are brushed up against something

Nice sturdy good looking bookmarks.

I really like my Audubon bookmarks. They came very quickly, with free shipping thru my Prime. They are very attractive. Some reviews on other similar bookmarks complain about the quality or the fact that you tear them off leaving perforations. The quality seems good to me, they are glossy, and

substantial paper weight. If the perforations bother you so much just trim them off, there is plenty of room along the white border.

beautiful art work

lovely glossy pictures make fun bookmarks. Although after breaking them apart, I still trimmed off the perforated edges for a cleaner look. The price was right.

If you need one or more little items to jack your order up to \$25 for free shipping, this is a nice way to go. True, these do tear-out of a little book (and thus have a perforated edge) but they tear easily, and these bookmarks are handy when you want to avoid folding the corner of a page! (Folding page corners devalues books; a bookmark is far better.) The photos are on heavy laminated stock, and with birds in my family, I love supporting the Audubon Society!

These were purchase for an inmate in Texas. He is a part of a reading program. But needed bookmarks. Because these are sent like a book he was able to keep them he loves the birds they are beautiful thank you!

I find it a little annoying to need to carefully "tear" the bookmarks out of a folder one at a time only to end up with 12 bookmarks all having one smooth edge and one perforated edge. If NASA can land a probe on Mars, wouldn't you think the printer could find a cost-effective fix for this? That said, the images are attractive and the paper stock is a nice weight with an attractive glossy finish.
