Customer Reviews

Who doesn't love this form of art. I mean this form of art is just alluring and so so much amazing that

you can't take your eyes off from Calligraphy. This book is your first step towards Calligraphy as it explains all the basic stuff.

I have seen many of my friends with awesome handwriting and calligraphy, and always wanted to have a good grip on my handwriting for that I have tried many things but disappointed. Now with the help of this guide I can really improve my handwriting. This guide train you step-by-step and gives a lot of information and tips and tricks to work with your handwriting.

There's information in this book for beginners but not much more than that. There are e some examples of calligraphy but no instructions or lessons. There are many examples shown but not where you can find them. There is one called Freebooters Script Regular and I wanted to know more about it but it was just a 2 word example. This was free for me so I did learn about supplies.

The complete guide for the calligraphy and the amazing helpbook for the writing in letters. Amazing book to read it. Simply love it. The complete user guide foe me and i think always for anyone who read it.
