Advanced Practice Nursing Of Adults In Acute Care

Synopsis

Written by a Clinical Nurse Specialist for Clinical Nurse Specialists, this text explores the expanding roles and responsibilities of the CNS— from core competencies and theoretical foundations for practice to caring for the hospitalized adult to shaping the healthcare system through the CNS’s spheres of influence. With a special emphasis on the practical application in clinical practice the author uses a body-system approach to guide readers through evidence-based collaborative and independent nursing interventions within the framework of the CNS role.

Customer Reviews

Great book for the Clinical Nurse Specialist, and such a rare find among APRN literature (most being geared toward NPs). This was optional for my Adult/Gero CNS curriculum reading, but I bought it because we had some select readings in our modules. I love this book (which is saying a lot for a student at the end of instruction, I graduate in May!). Very organized reading, and no "fluff". Very relevant material.

A good recoup of Adult Health from the advanced practitioner's perspective.

This is an awesome text and resource studying for CNS board exam. It puts it all together from the 3 Ps and the clinical practicums and includes drug info (drug classes for most part). I am pairing it with online course offered by AACN as a prep course for ACCNS - AG. I have read 3/4 of book and plan

to complete within next 6 weeks before my exam. It is giving me confidence in the material. Would be great text during practicums with its compilation of concepts. Refers to latest EBP literature up thru 2011-2012 range.

The book was well organized and contained good information, but the large number of typographical errors made it very difficult to read at times. I think the editor should proof read it once (or twice) more.

This book was required for CNS coursework. It's fantastic as it truly does focus on CNS involvement in advanced practice management vs. just general "medical" management.

It says APN in Acute care. Inside it is mainly written of Clinical Nurse Specialist. The contents work for the ANP as well though.

Great deal!! Looked brand new!

Straightforward simple wording utilized for easy comprehensible reading. The investment for this purchase was well worth it. It will be a reference book for life.
