# Investigating Biology Lab Manual (7th Edition)

## Synopsis

With its distinctive investigative approach to learning, this best-selling laboratory manual encourages you to participate in the process of science and develop creative and critical reasoning skills. You are invited to pose hypotheses, make predictions, conduct open-ended experiments, collect data, and apply the results to new problems. The Seventh Edition emphasizes connections to recurring themes in biology, including structure and function, unity and diversity, and the overarching theme of evolution. Select tables from the lab manual are provided in Excel format in MasteringBiology at [www.masteringbiology.com](http://www.masteringbiology.com), allowing you to record data directly on their computer, process data using statistical tests, create graphs, and be prepared to communicate your results in class discussions or reports.

## Book Information

Spiral-bound: 828 pages

Publisher: Benjamin Cummings; 7 edition (October 18, 2010)

Language: English

ISBN-10: 0321668219

ISBN-13: 978-0321668219

Product Dimensions: 8.4 x 1 x 10.7 inches

Shipping Weight: 3.3 pounds (View shipping rates and policies)

Average Customer Review: 3.9 out of 5 stars 21 customer reviews

Best Sellers Rank: #104,582 in Books (See Top 100 in Books) #75 in Books > Science & Math > Reference #637 in Books > Textbooks > Science & Mathematics > Biology & Life Sciences > Biology #1240 in Books > Science & Math > Biological Sciences > Biology

## Customer Reviews

Jane B. Reece As Neil Campbell's longtime collaborator, Jane Reece has participated in every edition of BIOLOGY. Earlier, Jane taught biology at Middlesex County College and Queensborough Community College. Her research as a doctoral student and postdoc focused on genetic recombination in bacteria. Besides her work on BIOLOGY, she has been a coauthor on Biology: Concepts & Connections, Essential Biology, and The World of the Cell. Lisa A. Urry Lisa Urry (Units 1-3) is a professor and developmental biologist, and recent Chair of the Biology Department, at Mills College. After graduating from Tufts University with a double major in Biology and French, Lisa completed her Ph.D. in molecular and developmental biology at MIT. She has published a number of research papers, most of them focused on gene expression during

embryonic and larval development in sea urchins. Lisa is also deeply committed to promoting opportunities for women in science education and research.

• Michael L. Cain Michael Cain (Units 4 and 5) is an ecologist and evolutionary biologist who is now writing full time. Michael earned a joint degree in Biology and Math at Bowdoin College, an M.Sc. from Brown University, and a Ph.D. in Ecology and Evolutionary Biology from Cornell University. As a faculty member at New Mexico State University and Rose-Hulman Institute of Technology, he taught a wide range of courses including introductory biology, ecology, evolution, botany, and conservation biology. . Michael is the author of dozens of scientific papers on topics that include foraging behavior in insects and plants, long-distance seed dispersal, and speciation in crickets. In addition to his work on Campbell BIOLOGY, Michael is also the lead author of an ecology textbook.

• Steven A. Wasserman Steve Wasserman (Unit 7) is a professor at the University of California, San Diego (UCSD). He earned his A.B. in Biology from Harvard University and his Ph.D. in Biological Sciences from MIT. Through his research on regulatory pathway mechanisms in the fruit fly *Drosophila*, Steve has contributed to the fields of developmental biology, reproduction, and immunity. As a faculty member at the University of Texas Southwestern Medical Center and UCSD, he has taught genetics, development, and physiology to undergraduate, graduate, and medical students. He has also served as the research mentor for more than a dozen doctoral students and more than 50 aspiring scientists at the undergraduate and high school levels. Steve has been the recipient of distinguished scholar awards from both the Markey Charitable Trust and the David and Lucille Packard Foundation. In 2007, he received UCSD's Distinguished Teaching Award for undergraduate teaching.

• Peter V. Minorsky Peter Minorsky (Unit 6) is a professor at Mercy College in New York, where he teaches evolution, ecology, botany, and introductory biology. He received his B.A. in Biology from Vassar College and his Ph.D. in Plant Physiology from Cornell University. He is also the science writer for the journal *Plant Physiology*. After a postdoctoral fellowship at the University of Wisconsin at Madison, Peter taught at Kenyon College, Union College, Western Connecticut State University, and Vassar College. He is an electrophysiologist who studies plant responses to stress. Peter received the 2008 Award for Teaching Excellence at Mercy College.

• Robert B. Jackson Rob Jackson (Unit 8) is a professor of biology and Nicholas Chair of Environmental Sciences at Duke University. Rob holds a B.S. in Chemical Engineering from Rice University, as well as M.S. degrees in Ecology and Statistics and a Ph.D. in Ecology from Utah State University. Rob directed Duke's Program in Ecology for many years and just finished a term as the Vice President of Science for the Ecological Society of America. Rob has received numerous awards, including a Presidential Early Career Award in

Science and Engineering from the National Science Foundation. He also enjoys popular writing, having published a trade book about the environment, *The Earth Remains Forever*, and two books of poetry for children, *Animal Mischief* and *Weekend Mischief*.  
Â

I've rented this book before through prime. I needed it again for a class I did not expect to take. Not only was the book in one month late, it was missing about 75% of it's pages. Unacceptable. I do blame the seller for that one though. handled the refunding process in a timely manner. I gave a two because the product is alright, but future bio students be wary, they're updating the lab manuals and books this year. I know one of the biggest complaints is that the images aren't in color. The next edition aims to fix that. But this one has worked so far, and will probably be much cheaper.

It looks new and very clean! All the pages are intact! Also, fast delivery! Thank you!!!

This was delivered as a teacher version I remember so I had to return it but the quality was pretty decent.

This lab manual is the bomb. Had to get it for a bio class I took at community college and it helped me SO MUCH to understand lab concepts. When I ended up teaching the same class at another school and the class did not use this I realized how much it really does help

I ordered the book with regular shipping and it came a whole week earlier! Very happy!! Right book, few scuff marks but overall great!

Have of the book was missing!

Product arrived in a timely fashion and as described

It was exactly what I needed for my Bio Lab class and even better, they sent me the teacher's edition by mistake so it saved me a lot of time and allowed me to actually understand what was going on in the labs
